## **GUJARAT TECHNOLOGICAL UNIVERSITY**

**B. Pharm-Semester-VII May-2012 Examination** Subject code: 270006

Subject Name: Pharmacology III

Date: 30-05-2012 Time: 02:30pm to 5:30pm Instructions: **Total Marks: 80** 1. Attempt any five questions.

- Make suitable assumptions wherever necessary.
   Figures to the right indicate full marks.

Q.1		Classify antiulcer agents? Discuss management of stress induced Ulcers. What is resistance? Discuss the mechanisms of resistance to chemotherapeutic agents.	06 05
	(c)	Write a brief note on pharmacology of Nitric Oxide.	05
Q.2	(a)	Discuss the physiological role of Thyroxine. Explain the mechanism and adverse	06
		effects of Methimazole. Discuss the pharmacology of Tocolytics. Enumerate antiHIV agents. Write a note on antiherpes virus agents.	05 05
Q.3	(b)	Classify drugs used in asthma? Explain the role of SABA in therapy of asthma. Explain the mechanism of action of 1. Kanamycin 2. Omalizumab. Classify different Immunosupressants. Write a brief note on TNF- $\alpha$ inhibitors.	06 05 05
Q.4	(a)		06
	` '	on Isoniazid. Enumerate antifungal agents. Write in detail about systemic antifungal agents. Write a brief note on Macrolides.	05 05
Q.5	(a)	Classify anticancer agents based on mechanism of action. Write in brief about Cyclophosphamide.	06
	` '	Explain the mechanism, adverse effects and uses of Cephalosporins.  Describe the therapeutic uses and adverse effects of Glucocorticoids.	05 05
<b>ე</b> . 6	(a)	Describe in brief the pharmacology of FluoroQuinolones. Highlight the	06
	` '	advantages of gatifloxacin over norfloxacin. Enumerate the pituitary hormones. Discuss in brief ADH. Enumerate oral antidiabetic agents. Discuss DPP4 inhibitors in brief.	05 05
Q.7		Comment on following (any four)  1. Streptomycin is contraindicated in patients of Renal failure.  2. Metformin overdose leads to metabolic acidosis.  3. Use of nandrolone is banned in athletes.  4. Ketoconazole maybe used for the treatment of patients with Cushing's Syndrome.  5. Dextromethorphan is preferred over Codeine as antitussive agent.	06
	(b)	Explain the mechanism of action of 1. Amphotericin 2. Montelukast Classify laxatives. Write in brief about Osmotic and Bulk laxatives.	05 05
